No.2-16/2009-Pers-II
BHARAT SANCHAR NIGAM LIMITED
[A Government of India Enterprise]
CORPORATE OFFICE
PERSONNEL -II SECTION
102-B, Statesman House, 148, Barakhamba Road, New Delhi-1.

5th January, 2010

To

All Heads of Telecom Circles
All Heads of Telecom Projects/Regions
All Heads of Maintenance
CGM BRBRAITT, Jabalpur/CGM, ALTTC
CGM, Kokatta Telephones/Chennai Telephones
CGM T&D/QA/CTS Kolkata/TF-Mumbai, Jabalpur, Kolkata
CGM NCES/DNW/NATFAM, Hyderabad
Bharat Sanchar Nigam Limited

Subject: Limited Departmental Competitive Examination for promotion to the grade of Sub Divisional Engineer (Telecom) for vacancy years 2006-07 and 2007-08 under 33% quota. —Regarding circulation of revised syllabus of Paper II i.e Advanced Technical (Special).

This is in continuation to this office letter No even dated 20.10.2009 vide which the syllabus and scheme of LDCE for promotion to the grade of Sub Divisional Engineer (Telecom) for vacancy years 2006-07 and 2007-08 under 33% quota was circulated.

The Syllabus of Paper II. i.e Advanced Technical (Special) has been revised, which is enclosed herewith for circulation among all concerned. The contents of Paper —I will however remain unchanged.

This letter may be given wide publicity.

(V.K.SINHA)
ASSISTANT GENERAL MANAGER (PERS-II)

Encl: Modified Syllabus of Paper II.

Copy to:-
1. GM(Erst)/GM(Pers)/DGM(Pers)/AGM(Pers-IV) Corporate Office
2. GM(IR)/DGM(DE)/ AGM(DE), Corporate Office – with the request to take further necessary action.
3. All GMs/DGMs, BSNL Corporate Office.
4. Director(Staff)/US(SGT), DoT, Sanchar Bhavan, New Delhi.
5. M/s TCIL, Greater Kailash, New Delhi
6. All Unions/Associations concerned.
7. OL Section for Hindi Version
8. Notice Boards
9. Spare/Guard File
SYLLABUS FOR LIMITED COMPETITIVE DEPARTMENTAL EXAMINATION AGAINST 33% QUOTA FOR PROMOTION TO SDE(T) GRADE

Paper-II: Advanced Technical Paper (Special) Maximum Marks 100
(A candidate can select only one of the seven subjects i.e. A,B,C,D,E,F &G while applying for LDCE)

A. SWITCHING (Subsections from 1 to 5 are compulsory)

1. Intelligent Network and Services
   Basic concepts of Intelligent Network architecture, Functions and role of SSP, SCP, SMP, IP etc., Description of various types of IN services and call flow, Access codes for various services.

2. Signaling Systems including CCS#7
   Various signaling systems being in the department for local and trunk network such as E/M, R2 modified, CCS#7 etc, Concepts of CCS-7 signaling including signaling point (SP), Signal transfer point (STP), Layered structure with reference to OSI-layer architecture, Description of MTP, ISUP, SCCP and TCAP 3, Application of No.7 signaling in PSTN, ISDN, IN and Mobile telephony.

3. ISDN
   Review of OSI layer, ISDN introduction and services, Customer premises equipment, ISDN implementation strategies etc.

4. Long Distance Switching
   Details of national switching/numbering/routing/charging/transmission and signaling/synchronization plans.

5. Earthing etc.
   Earthing of Telecom systems, Maintenance of Battery and Power Plants, Fire protection systems-types, use and maintenance schedule, basic maintenance of EA sets and air-conditioning units.
6) E-10 B Switching System

Introduction to E-10B system, Description of links, connection units, time base, switching network, control units etc., Call set up procedures, OMC hardware/software, Man-machine communication, OMC restart/system regeneration/system saving, Peripheral management, Subscriber Management, Traffic administration, Trunk administration, Routing administration, Billing management, Faults & alarms management, Periodic tasks, LOCAVARs, Subscriber features, Exchange maintenance, Installation & commissioning activities, A/T procedures, Documentation, Use of various testers, Exchange service quality tests.

OR

7) CDOT Digital Switching System (MAX)

System configuration & Features, Hardware architecture, installation practices, Software overview, Equipment planning, Man machine communication, Call processing, Subscriber facilities, Exchange administration, Subscriber administration, Routing administration, Trunk administration, Traffic administration, Billing administration, Patch administration, Maintenance procedures, Alarms and reports and System reconfiguration.

OR

8) EWSD Switching System

Overview of system architecture, Description of various functional units like DLU, LTG, SN, CP., MB, CCG, SYP, CCNC etc., Call set up procedures, CCS#7, Application Program System Administration, Subs Administration, ISDN Administration, V5.2, Routing Charging Administration including IACHASTA, Traffic Administration, Network Administration, Physical Installation, APS Loading., Commissioning, A/T, Planning & Dimensioning, Documentation, EWSD Maintenance Philosophy, Line & Trunk Testing, Emergency Concepts, Concept of Telecom Assistance Centre, Charge Band Concept in CCS#7, Patch Implementation Procedures.

OR

9) 5ESS -2000 Switching System

Basic characteristics & functions of 5ESS switch, Description of SM, SM2000, CM & AM, RSM, Access Interface Unit (AIU), Call set up procedures, Implementation of CCS#7 and ISDN in 5ESS, Documentation structure and use of Master Control Centre, Subscriber and PBX data, Human/machine interface, Reports and alarm handling, Trunk and line maintenance, Routine maintenance, System back up, ODD recent change for trunks and line, 5ESS-2000 database, Analysis of system reports, initialization and recovery, Traffic measurement reports, Installation and commissioning activities, Testing methods, A/T procedures.
10). **OCB-283 Switching System**

OCB-283 system overview, Description of various units viz. SMC, SMA, SMT, STS, SMX, SMM, token ring and CSN, Call set up procedures, CCS#7, OCB-283 system software, OCB-283 operations, Man-machine commands, system administration, Subscriber administration, Routing administration, Charging & Billing administration, Traffic management, Network management, Planning & dimensioning issues, Physical installation and commissioning activities, A/T procedures, OCB-283 maintenance procedures, Path implementation methods.

OR

11). **AXE-10 Switching System**

AXE-10 system overview, Description of various subsystems viz. Central Processor Subsystem (CPS), Regional Processor Subsystem (RPS), Input-Output Group (IOG-11B), Subscriber Switching Subsystem (SSS), Group Switching Subsystem (GSS), Trunk and Signaling Subsystem (TSS), Common Channel Signaling Subsystem (CCS), SUS,TCS,CHS & OMS, AXE-10 software organization, Call handling, Documentation, I/O handling, Planning and dimensioning, Installation and testing activities, Construction practice, Management of exchange data related to hundred groups. A-number and B-number analysis, routes, routing, Charging, destination codes, EOS codes etc., Installation test of GSS, SSS,TSS, CCS, RPS/EMS, Start up & test of IOG-11B, Start up and test of APZ 212, Initial loading of APG, User authority management (password management) Connection of ats, management of announcements. Operational quality measurement, A/T procedures, Use of testers, System maintenance philosophy, Subscriber management, Subscriber management, Maintenance of subscriber lines, trunks, hardware of SSS,GSS,RPS/EMS,IOG-11B & CPS, Handling detailed billing data, call meters, system restart, reload & back up, Command & transaction logs, traffic and service measurements.

**B  TRANSMISSION**

**100 Marks**

**OPTICAL FIBRE COMMUNICATION**

Basic concepts and principles of optical communication. Optical fiber cable characteristics and Design features like multimode and single mode fibers. Graded Index Fibers, Dispersion, attenuation, optical fiber design(96 fibre cable), various types of optical sources and detectors, survey and able laying practices, route index diagram, link engineering, Tests and measurements on O.F. cable, functioning of various meters, their applications and operations like OTDR, DTA, Power meter etc.; Concepts of PHD Hierarchal MUX systems like 2,8,34, 140 MB systems, Basic concepts of SDH, Various types of SDH systems (STM-1/4/16 systems), SDH Multiplexing techniques, SDH Network Elements & Topology, Network Survivability, SDH Measurements faults and alarms through NMS, LCT, Element Manager, Synchronization of SDH network and measurement and synchronization, Basic concepts and advantages of DWDM systems, DWDM components like laser, detector, Transponders and Optical Amplifiers, DWDM testing-optical analyzer, A/T of OF system.
MICROWAVE:

System design objectives, CCITT and CCIR standards, Planning and designing of multichannel microwave system, Choice of Antennas, Wave guide, Ducting, fading and fade margin, Path Loss, Multipath fading, Microwave devices, travelling wave tube (TWT) Klystron, Semiconductor devices, engineering order wire supervisory protection switching and remote controls. Measurements of power and frequency, noise figure, group delay, Noise power and ratio measurement, standing waves ratio measurement amplitude and frequency response, Equalizers, Microwave site survey and selection, Tower Height Calculation, Critical Tower Height and Block Schematic of high capacity Microwave system. SACFA clearance, A/T of 6 Ghz and 2Ghz systems. Frequency bond and capacities of Digital UHF systems, Hop distance.

SATELLITE:

Overview of satellite communication, History and evolution, Frequency Bands used for satellite Communication, C, Ku and Ka bands, GEO and Non-GEO satellite orbits and systems, INSAT satellite system-purpose and evolution, Space Segment Attitude and orbit control, Earth Station Configuration and parameters, Antenna Characteristics, LNA and HPA - Types and characteristics Inter-modulation products and back off, relative comparison of SSPA and TWT power amplifier, elements of Satellite link engineering, C/N and BER, Bandwidth and power considerations, Need for VSAT communication, VSAT applications – MCPC VSAT, HVNET, Intermediate Data Rate and Digital Circuit Multiplexing equipment.

Miscellaneous

Earthling of Telecom. Systems, Maintenance of Battery and Power Plants, Fire protection systems – type use and maintenance schedule, basic maintenance of EA sets and air-conditioning units, PCM principles and Digital transmission concepts.

C. GSM

Overview of GSM Architecture

Brief history of development of Mobile Communication, Description of GSM Architecture Functions of various Network elements of GSM likes BTS, BSC, MSC, VLR, HLR and OMC etc. Role of IMSI, TMSI, IMEI MSRN.

Security Features in GSM:

Security arrangements in GSM Communication Functions of A3, A5, A8 Algorithm, Ki, Ke keys, Authentication and Ciphering functions of GSM.

RF Channel Management:

Cell layout and frequency planning, Frequency bands and specifications for GSM-900 system, Multiple Access Methods – FDMA & TDMA, Description of Air Interfaces, like logical channels and traffic Channels, Basic steps in call setup like connection request, IMSI attach and IMSI detach, Functions of Handovers and Frequency Hopping during conversation.
GPRS/EDGE/IMT-2000  
10 marks  

GSM Billing concept:  
10 marks  

GSM Services:  
10 marks  
Description of GSM services like Bearer Services, Tele Services and Supplementary Services, Short Message Services(SMS), Value Aided Services (VAS) like Mobile Messaging, Mobile Internet, Mobile IN Services, configuration of mobile handset for use of value added facilities and GPRS and EDGE features.

Miscellaneous:  
10 marks  
Earthling of Telecom. Systems, Maintenance of Battery and Power Plants, Fire protection systems-types use and maintenance schedule, basic maintenance of EA sets and air-conditioning units.

GSM Technology;  
30 marks  
Functionalties, Interconnection & configuration of MSC, BSC, BTS. Abis and A link dimensioning, Engineering, Planning & Traffic Measurements. GSM Signaling Model, Um Interface, Abis interface. A interface, location, Update, Handover, Description of NSS measurement & Statistics.

D. WLL(CDMA and CorDECT)  
100 Marks  
Cellular Concepts, Multiple Access Techniques, Duplexing Method, Frequency Band used in CDMA, Channel list.

Spread spectrum communications and its types, DSSS as used in CDMA cellular systems, codes used in CDMA and their functions, PN offset, Power Control, Soft hand Off, System Capacity, Rake receives, Multi-path Advantage, Processing Gain and Spreading Rates.

IS-95 A and CDMA 2000 1 x standards and their features, System Architecture, Network elements – BTS, BSC, MSC, HHTs and FWTs PCF Functionality, Elements of Packet Switch core network – PDSN, AAA server etc.  
20 marks

RF Channel Architecture of IS-95 A, Channel coding and spreading rates, Modulation Methods, Functions of each channel, call flow, HHT and FWT programming parameters, SID, NID, Channel no. etc.  
15 marks
CDMA RF Planning basics, Various planning parameters – Eb/No. Ec/It FER, Frequency Reuse Factor, Sectorization Gain, Voice Activity factors, cell loading factor, cell breathing, cell capacity and coverage aspects, BTS coverage tests – VSWR Test, RF power measurement and spectrum analyzers, A/T and billing.  

15 marks

Variants of CDMA – CDMA 2000 1xEVDo, WCDMA – features CDMA and GSM – brief comparison.  

05 marks

CorDECT;  

10 marks

Cor-DECT system architecture, various sub-systems of Cor-DECT system and their functions, DIU, CBS, BSD, RBS, FRS functions and features, Frequency spectrum for cor-DECT, no. of carriers and carriers spacing, Access Method, Frame structure, DCS, Internet Access through cor-DECT, Access procedure and available bit rates, A/T of cor-DECT system.

Miscellaneous:  

Earthing of Telecom. Systems, Maintenance of Battery, Power Plants and UPS, Fire protection systems-types use and maintenance schedule, basic maintenance of EA sets and air-conditioning units.

E. INTERNET AND BROADBAND  

100 Marks

Packet Switching & Circuit Switching , OSI Model & TCP/IP Model, Physical Layer standards – V 35, V 24, G703, HSSI etc.  

10 marks

Datalink layer Protocols – DLC, HDLC, PPP etc. PAP, CHAP, LANs & VLANs; Ethernet, FastEthernet and GigabitEthernet standards, CSMA-CD and switched Ethernet network, collision Domain and Broadcast Domain, Switched Ethernet Backbone.  

20 marks

20 marks

Transport Layer Protocols – TCP,UDP  

05 marks

Multiprotocol Level Switching(MPLS) – MPLS Label Distribution Protocol (LDP), QoS in MPLS Networks, Traffic Engineering in MPLS Network, RSVP  

10 marks

MPLS Based VPNs – Virtual Private Networks(VPNs), MPLS based Layer 3 VPNs MPLS based Layer 2 VPNs.  

10 marks

Broadband Access technologies x DSL Technologies, DSLAM & ADSL Modems, BRAS Tier I & II switch, DMT Modulation Technique, PPPoE.  

10 marks

WiFi & WiMAX;  

05 marks

Miscellaneous Earthing of Telecom. Systems, Maintenance of Battery, Power Plants and UPS, Fire protection systems-types use and maintenance schedule, basic maintenance of EA sets and air-conditioning units  

10 marks
F. COMPUTERS, COMPUTER NETWORK AND APPLICATION PACKAGES: 100 Marks

COMPUTER FUNDAMENTALS 15 marks
Fundamentals of Personal Computers, use of Windows, Operating System, Introduction to software packages like MS word, MS Excel and MS Power point. Use of Internet for office work like e-mail, web browsing etc; features of linux operating system, Linux file system, basic and Advanced Commands, Graphical User Interface (KDE & GNOME) Open Office.

WEB TECHNOLOGIES 15 marks
Creation of Static Web Page, which includes the designing and developing of Static Web pages using HTML coding and FrontPage, Image processing tool such as Adobe Photoshop, Web-site Designing containing Dynamic Web Pages, Active Server pages (ASP), VB Script, Java script, Connectivity of the front end web applications (ASP & Java script) with the back end database applications, Hosting of Websites.

NETWORKING 25 marks
Internet Protocols, Network Components and Architecture, IP Addressing and Subnetting, Network Operating system, Active Directory, DHCP, DNS, Client configuration and User /Group Creation, Sharing of Network Resources, Disk Quota, WLAN, Proxy server, Firewall.

RDBMS; 20 marks
RDBMS Concepts, SQ, SQL*Plus and PL/SQL
Oracle Architectural Components, Maintaining an Oracle Instance, Creating a Database, Data Dictionary contents and Usage, Maintaining the Control File, Maintaining Redo Log files, Managing Tablespaces and Data Files, Storage structure and Relationships Managing Undo Data, Managing Tables, Managing Indexes, Managing Data Integrity, Managing Passwords Security and Resources, Managing Users, Managing Privileges, Managing Roles, Oracle Recovery Manager.

BSNL Software Applications 15 marks
Familiarization with various departmental applications like DOTSOFT, BRMS, HR package etc.

Miscellaneous 10 marks
Earthling of Telecom. Systems, Maintenance of Battery, Power Plants and UPS, Fire protection systems-types use and maintenance schedule, basic maintenance of EA sets and air-conditioning units
G. EXTERNAL PLANT AND ACCESS NETWORKS

WLL – Overview of CDMA, CorDECT, installation and maintenance of FWTs and CPE. 15 marks

Mobile – Overview of GSM, GPRS and EDGE, configuration of mobile handset for use of value added facilities and GPRS and EDGE features. 15 marks

Fibre- PCM principles, Fibre laying practices, basics of SDH, ADM, SDH rings, FTTH, DLC and MLLN 15 marks

Radio freq. planning for mobile and WLL technologies, siting consideration for BTS 05 marks

Broadband access – Copper based access, ADSL technologies, DSLAM 15 marks

JF cables, construction practices for cable external plant, siting of cabinets and pillars, monsoon precautions, preventive and reactive maintenance of external plant, fault location, Pole-less networks, optimization of External plant, computerized maintenance of records. 20 marks

Measurements – OTDR, DTA set, frequency counters, NEXT/FEXT measurement, Line parameters testing, jitter, BER parameters. 05 marks

Earthling of Telecom. Systems, Maintenance of Battery, Power Plants and UPS, Fire protection systems-types use and maintenance schedule, basic maintenance of EA sets and air-conditioning units 10 marks

Chet
